LANDSCAPE & TREE

50 S. Owasso Blvd. East - Little Canada, MN 55117

Phone (651) 484-2726 - Fax (651) 482-8191

Precision Landscape & Tree is looking to hire for multiple positions this upcoming season! We are a full service tree company that has been serving the Twin Cities area for over 35 years. We hold numerous municipal contracts in the metro area and are rapidly developing the residential and plant health care sides of our business. Candidates with no experience to very experienced are encouraged to apply. We are currently hiring for the following positions:

- 1) **Climber/Aerial lift operator:** 2-3 years' experience necessary. This position will be responsible for pruning and removing trees of all sizes using rope and saddle (with and without spikes) and from an aerial lift. Candidate must be proficient at tree identification, have a current class A or B CDL (or obtain within 2 months of hire), be familiar with all common arborist knots and roping techniques, and function as a leader on the job site. This position has potential to grow into a crew leader position. ISA Certified Arborist, or willing to obtain. Minnesota Category E (Turf and Ornamentals) applicator license a major plus.
- 2) **Plant Health Care Technicians:** 1+ years' experience preferred. This position will assist the plant health care manager with Emerald Ash Borer injections and has the opportunity to help develop a full, in-house plant health care department within the company. This is an incredible experience for anyone looking to grow within the field of plant health care. Position will also require working on the tree crew (as groundsman or, if interested, in aerial/climbing operations) as needed and/or if EAB injections slow down. Minnesota Category E (Turf and Ornamentals) applicator license required. Class A or B CDL, or ability to obtain within 2 months of hire. ISA Certified Arborist a plus, as is any college coursework in forestry, botany, entomology, dendrology, etc.
- 3) **Groundsman:** No experience necessary, but any experience in green industry preferred. This position will assist the arborists with all aspects of ground worker tree operations. This includes using a pole saw to prune small trees from ground, dragging brush, using chainsaws, helping rope large wood down from trees in a controlled and safe manner, learning common arborist knots and their utilization, stump grinding, equipment maintenance, and other duties as assigned. Class A or B CDL, or ability to obtain within 2 months of hire. Any experience a plus, but will train on job. This position is great for someone looking for a new career path in the field of arboriculture. There is ample room for growth within the company and the right person will rapidly be given opportunities to expand upon their skills and explore other aspects of the field.
- 4) **Loader Operators:** 2+ years' experience required as is a Class A or B CDL. Experience using loaders of various sizes to haul brush and wood from tree removals and prunes. This person will also assist the arborists with ground operations (as listed above) and has the potential to develop into aerial tree operations for interested individuals.

Precision Tree offers medical, dental, and life insurance benefits; along with very competitive wages compared to industry standards. We promote the continuing education of our employees and, for those interested, can provide training materials for ISA Certified Arborist, MN pesticide applicator, and class A or B CDL. In addition, we take all of our tree crew to the annual Minnesota Shady Tree Short Course; which provides great opportunities for ISA CEU's and arboricultural information for those growing in the field. The listed above qualifications are the desired qualifications, but don't be discouraged to apply if you don't meet them all! We are always looking for the "right person" to join our team.

Call today to apply (651-484-2726) or send your resume to adminplt@precisiontreemn.com.
