

# Graham Wessberg

## ISA Council of Representatives

### **About Me**

I graduated with a Bachelor of Science in Forest and Natural Resource Management from the University of Minnesota in 2019. While there I worked for the UFOR lab as an undergraduate research assistant. This is where I gained my first experience in urban forestry and fell in love with the field. I have worked in both the private and public sectors. My current position is as an arborist with the City of St Louis Park where I have been for 3 years. I am an ISA Certified Arborist and hold the Tree Risk Assessment Qualification. I am looking to get more involved with MSA and ISA and would like to grow in the professional space and learn more about the organizations.

### **How can you contribute to the MSA Board of Directors?**

I can contribute to the MSA board by bringing my perspective on things discussed in the meetings and contributing in a positive way. Having experience in both the private and public sectors I have a unique perspective on urban forestry and I believe that would be of value to the board.

### **Why do you think you would make a good board member?**

I would make a good board member because I care about the industry and would like to contribute to its growth and professional organizations. I am a hard worker, timely, organized and good communicator. I feel that I would make a good liaison because I can listen and share information well. I love to learn and am ready to take on a role such as this.
